2.1	PROJ	ECT NAME: Norwood Drainage Improvements – Elm Avenue Sewer		
2.2	BRIEF PROJECT DESCRIPTION - (Sections A through C):			
	A:	SPECIFIC LOCATION:		
		City of Norwood – Hamilton County Rear yards of residents along Ridgeway Avenue & Woodlawn Avenue north of Maple to Elm Avenue, 100' east of Franklin Avenue. (See attached map)		
	В:	PROJECT ZIP CODE: 45212 PROJECT COMPONENTS:		
		 Remove existing pipe Reconstruct existing catch basins and manholes Construct new manholes and catch basins Install new pipe (upsized) Construct new detention basin 		
	C:	PHYSICAL DIMENSIONS / CHARACTERISTICS:		
		Begin project (rear yards) to Maple Avenue – 600 lf Maple Avenue to Elm Avenue (pavement) – 500 lf Sherman Avenue (500' east of Allison Avenue – in front of High School) – 100 lf		
	D:	DESIGN SERVICE CAPACITY: Detail current service capacity vs. proposed service level.		
		The current service capacity is unable to handle the number of households it		

The current service capacity is unable to handle the number of households it currently is required to serve. This project would enable the stormwater to drain from the area properly alleviating a flooding and sewer back-up problem that has existed for many years.

Road or Bridge: Current ADT Year:	Projected ADT: Year:
Water/Wastewater: Based on monthly usage of ordinance. Current Residential Rate: \$	f 7,756 gallons per household, attach current rate Proposed Rate: \$
Stormwater: Number of households served:	_@70
USEFUL LIFE / COST ESTIMATE:	Project Useful Life: 50 Years.

2.3

Attach <u>Registered Professional Engineer's</u> statement, with <u>original seal and signature</u> confirming the project's useful life indicated above and estimated cost.

3.0 REPAIR/REPLACEMENT or NEW/EXPANSION:

Changes in Project Officials must be submitted in writing from the CEO.

^{*} Failure to meet project schedule may result in termination of agreement for approved projects. Modification of dates must be requested in writing by the CEO of record and approved by the commission once the Project Agreement has been executed. The project schedule should be planned around receiving a Project Agreement on or about July 1st.

6.0 ATTACHMENTS/COMPLETENESS REVIEW:

Confirm in the blocks [] below that each item listed is attached.

- [n/a] A certified copy of the legislation by the governing body of the applicant authorizing a designated official to sign and submit this application and execute contracts. This individual should sign under 7.0, Applicant Certification, below.
- [X] A certification signed by the applicant's chief financial officer stating <u>all local share</u> funds required for the project will be available on or before the dates listed in the Project Schedule section. If the application involves a request for loan (RLP or SCIP), a certification signed by the CFO which identifies a specific revenue source for repaying the loan also must be attached. Both certifications can be accomplished in the same letter.
- [n/a] A cooperation agreement (if the project involves more than one subdivision or district) which identifies the fiscal and administrative responsibilities of each participant.
- [X] A registered professional engineer's detailed cost estimate and useful life statement, as required in 164-1-13, 164-1-14, and 164-1-16 of the Ohio Administrative Code. Estimates shall contain an engineer's <u>original seal or stamp and signature</u>, subdivision or district) which identifies the fiscal and administrative responsibilities of each participant.
- [n/a] Projects which include new and expansion components <u>and</u> potentially affect productive farmland should include a statement evaluating the potential impact. If there is a potential impact, the Governor's Executive Order 98-VII and the OPWC Farmland Preservation Review Advisory apply.
- [X] Capital Improvements Report: (Required by O.R.C. Chapter 164.06 on standard form)
- [X] Supporting Documentation: Materials such as additional project description, photographs, economic impact (temporary and/or full time jobs likely to be created as a result of the project), accident reports, impact on school zones, and other information to assist your district committee in ranking your project. Be sure to include supplements which may be required by your *local* District Public Works Integrating Committee.

7.0 APPLICANT CERTIFICATION:

The undersigned certifies that: (1) he/she is legally authorized to request and accept financial assistance from the Ohio Public Works Commission; (2) to the best of his/her knowledge and belief, all representations that are part of this application are true and correct; (3) all official documents and commitments of the applicant that are part of this application have been duly authorized by the governing body of the applicant; and, (4) should the requested financial assistance be provided, that in the execution of this project, the applicant will comply with all assurances required by Ohio Law, including those involving Buy Ohio and prevailing wages.

Applicant certifies that physical construction on the project as defined in the application has NOT begun, and will not begin until a Project Agreement on this project has been executed with the Ohio Public Works Commission. Action to the contrary will result in termination of the agreement and withdrawal of Ohio Public Works Commission funding of the project.

Victor Schneider, Director of Public Service
Certifying Representative (Type or Print Name and Title)

I HEREBY CERTIFY THIS TO BE AN ACCURATE ESTIMATE OF THE PROPOSED PROJECT. THE USEFUL LIFE OF THIS PROJECT IS 50 YEARS?

DANIEL W. SCHOSTER, P.E.

Donnie R. Jones, CPA City Auditor

Janet Kennedy Deputy Auditor

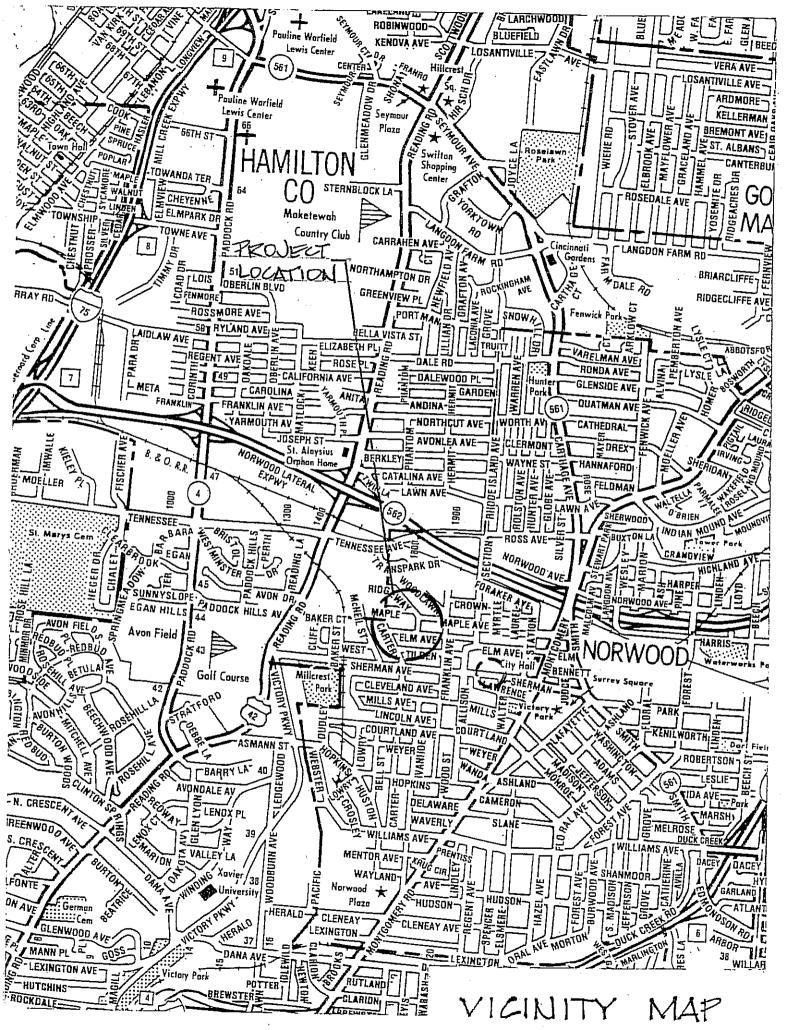

4645 Montgomery Road Norwood, Ohio 45212 Ph. 513-458-4570 Fax 513-458-4571

December 13, 2001

To Whom It May Concern:

I, Donnie R. Jones, Auditor, of the City of Norwood, hereby certify that the City of Norwood will use the Street Maintenance and Repair Fund, Permissive Tax Fund, Water Fund and/or other Funds as authorized by Norwood City Council to repay the interest free loan for the Norwood Drainage Improvements/Elm Avenue Storm Sewer Repair Project pending full approval by the City of Norwood Council and Administration and the Ohio Public Works Commission.

Donnie R. Jones

ADDITIONAL SUPPORT INFORMATION

For Program Year 2002 (July 1, 2002 through June 30, 2003), jurisdictions shall provide the following support information to help determine which projects will be funded. Information on this form must be accurate, and where called for, based on sound engineering principles. Documentation to substantiate the individual items, as noted, is required. The applicant should also use the rating system and its' addendum as a guide. The examples listed in this addendum are not a complete list, but only a small sampling of situations that may be relevant to a given project.

1) What is the physical condition of the existing infrastructure that is to be replaced or repaired?

Give a statement of the nature of the deficient conditions of the present facility exclusive of capacity, serviceability, health and/or safety issues. If known, give the approximate age of the infrastructure to be replaced, repaired, or expanded. Use documentation (if possible) to support your statement. Documentation may include (but is not limited to): ODOT BR86 reports, pavement management condition reports, televised underground system reports, age inventory reports, maintenance records, etc., and will only be considered if included in the original application. Examples of deficiencies include: structural condition; substandard design elements such as widths, grades, curves, sight distances, drainage structures, etc.

The storm sewer is severely undersized (existing 24" & 30"; required 48" & 60" – refer to drainage study) resulting in dangerous flooding in the street (i.e. 5' of standing water on Elm Avenue; 9/12/98 & 6/20/01 storm events-refer to Enquirer article June 2001 pictures). Pipe is old and experiencing deterioration (refer to report). Estimated age of infrastructure is 50-100 yrs. old.

2) How important is the project to the safety of the Public and the citizens of the District and/or service area?

Give a statement of the projects effect on the safety of the service area. The design of the project is intended to reduce existing accident rate, promote safer conditions, and reduce the danger of risk, liability or injury. (Typical examples may include the effects of the completed project on accident rates, emergency response time, fire protection, and highway capacity.) Please be specific and provide documentation if necessary to substantiate the data. The applicant must demonstrate the type of problems that exist, the frequency and severity of the problems and the method of correction.

Residences and streets are experiencing extreme flooding causing temporary closures and property damage. As with any body of water there is risk of children inadvertantly being submerged, back-ups in basements, motorists travelling through a flooded area and Fire Department runs to the area during flooding events. This problem is causing sanitary back-ups into several basements in the area causing property damage as well as a health risk.

3) How important is the project to the health of the Public and the citizens of the District and/or service area?

Give a statement of the projects effect on the health of the service area. The design of the project will improve the overall condition of the facility so as to reduce or eliminate potential for disease, or correct concerns regarding the environmental health of the area. (Typical examples may include the effects of the completed project by improving or adding storm drainage or sanitary facilities, replacing lead jointed water lines, etc.). Please be specific and provide documentation if necessary to substantiate the data. The applicant must demonstrate the type of problems that exist, the frequency and severity of the problems and the method of correction.

The project will alleviate standing pools of water which are created during the flooding as well as the sanitary back-ups into residences and businesses affected. The June 2001 rainfall caused extensive damage to property and buildings, pictures attached.

The jurisdiction must submit a listing in priority order of the projects for which it is applying. Points will be awarded on the basis of most to least importance.
Priority 1Montgomery Road
Priority 2Elm Avenue Storm Sewer
Priority 3 Williams Avenue
Priority 4
Priority 5
5) Will the completed project generate user fees or assessments?
Will the local jurisdiction assess fees or project costs for the usage of the facility or its products once the project is completed (example: rates for water or sewer, frontage assessments, etc.).
No X Yes If yes, what user fees and/or assessments will be utilized?
6) Economic Growth – How will the completed project enhance economic growth
Give a statement of the projects effect on the economic growth of the service area (be specific).
As this system affects Norwood and is tributary to St. Bernard, it will affect any business in
the area and will permit them to further develop their businesses without these occurrences. Small
businesses in the area had extensive damage and have to provide protection against this in the
future creating an extra cost burden which will deter future businesses from locating to this area.
7) Matching Funds - LOCAL
The information regarding local matching funds is to be filed by the applicant in Section 1.2 (b) of the Ohio Public Works Association's "Application For Financial Assistance" form.
8) Matching Funds - OTHER
The information regarding local matching funds is to be filed by the applicant in Section 1.2 (c) of the Ohio Public Works Association's "Application For Financial Assistance" form. If MRF funds are being used for matching funds, the MRF application must have been filed by August 6 of this year for this project with the Hamilton County Engineer's Office. List below, the source(s) of all "other" funding

4) Does the project help meet the infrastructure repair and replacement needs of the applying jurisdiction?

of the district?					
Describe how the proposed project will alleviate serious traffi	c problems	s or hazards (be	specific	e).	
The drainage for this area of Norwood has be	en a prol	olem for years.	Ade	quately si	zing the
pipes in the project area will alleviate this problem a	nd the siz	ing would be	<u>satisfa</u>	ctory for	future
years. No growth to the project area is anticipated th	at would	increase the a	moun	t of runof	f in the
project area.				··	
For roadway betterment projects, provide the existing and promethodology outlined within AASHTO'S "Geometric Design of Manual.					
Existing LOS Proposed LOS _					
If the proposed design year LOS is not "C" or better, explain when	ıy LOS "C	" cannot be achie	ved.		
10) If SCIP/LTIP funds are granted, when would the const	ruction co	ntract be award	ed?		
If SCIP/LTIP funds are awarded, how soon after receiving the Formula of the year following the deadline for applications) would the p status reports of previous projects to help judge the accuracy of	roject be u	inder contract?	The Sup	port Staff	
Number of months 9					
a.) Are preliminary plans or engineering completed?	Yes	No	X	N/A _	
b.) Are detailed construction plans completed?	Yes	No	X	N/A	
c.) Are all utility coordination's completed?	Yes	No	X	N/A	
d.) Are all right-of-way and easements acquired (if applicable)?	Yes	No		N/A	X
If no, how many parcels needed for project?	_ Of these,	how many are:	ſakes _		
		7	empor	ary	
				ent	
For any parcels not yet acquired, explain the status of t	he ROW a	cquisition proces	s for th	is project.	
e.) Give an estimate of time needed to complete any item above	not yet cor	npleted.	_5	months	i .

9) Will the project alleviate serious traffic problems or hazards or respond to the future level of service needs

11) Does the infrastructure have regional impact?
Give a brief statement concerning the regional significance of the infrastructure to be replaced, repaired, or expanded.
The existing system is tributary to the Ross Run Sewer (combined) which flows through St.
Bernard and to the Mill Creek in the rear yards along this system. The project would alleviate
flooding occurrences and combined sewer overflows.
12) What is the overall economic health of the jurisdiction?
The District 2 Integrating Committee predetermines the jurisdiction's economic health. The economic health of a jurisdiction may periodically be adjusted when census and other budgetary data are updated.
13) Has any formal action by a federal, state, or local government agency resulted in a partial or complete ban of the usage or expansion of the usage for the involved infrastructure?
Describe what formal action has been taken which resulted in a ban of the use of or expansion of use for the involved infrastructure? Typical examples include weight limits, truck restrictions, and moratoriums or limitations on issuance of building permits, etc. The ban must have been caused by a structural or operational problem to be considered valid. Submission of a copy of the approved legislation would be helpful.
Will the ban be removed after the project is completed?YesNoN/AX
14) What is the total number of existing daily users that will benefit as a result of the proposed project?
For roads and bridges, multiply current Average Daily Traffic (ADT) by 1.20. For inclusion of public transit, submit documentation substantiating the count. Where the facility currently has any restrictions or is partially closed, use documented traffic counts prior to the restriction. For storm sewers, sanitary sewers, water lines, and other related facilities, multiply the number of households in the service area by 4. User information must be documented and certified by a professional engineer or the jurisdictions' C.E.O.
Traffic: ADT X 1.20 = Users
Water/Sewer: Homes 70 X 4.00 = 280 Users
15) Has the jurisdiction enacted the optional \$5 license plate fee, an infrastructure levy, a user fee, or dedicated tax for the pertinent infrastructure?
The applying jurisdiction shall list what type of fees, levies or taxes they have dedicated toward the type of infrastructure being applied for.
Optional \$5.00 License Tax
Infrastructure Levy Specify type
Facility Users Fee Specify type
Dedicated Tax Specify type
Other Fee, Levy or Tax Specify type
IF YOU ARE APPLYING FOR A GRANT, WILL YOU BE WILLING TO ACCEPT A LOAN IF ASKED BY THE DISTRICT? XX YES NO (ANSWER REQUIRED) Note: Answering "Yes" will not increase your score and answering "NO" will not decrease your score.

SCIP/LTIP PROGRAM ROUND 16 - PROGRAM YEAR 2002 PROJECT SELECTION CRITERIA JULY 1, 2002 TO JUNE 30, 2003

ADDENDUM TO THE RATING SYSTEM

General Statement for Rating Criteria

Points awarded for all items will be based on engineering experience, field verification, application information and other information supplied by the applicant, which is deemed to be relevant by the Support Staff. The examples listed in this addendum are not a complete list, but only a small sampling of situations that may be relevant to a given project.

Criterion 1 - Condition

Condition is based on the amount of deterioration that is field verified or documented exclusive of capacity, serviceability, health and/or safety issues. Condition is rated only on the facility being repaired or abandoned. (Documentation may include: ODOT BR86 reports, pavement management condition reports, televised underground system reports, age inventory reports, maintenance records, etc., and will only be considered if included in the original application.)

Definitions:

Failed Condition - requires complete reconstruction where no part of the existing facility is salvageable. (E.g. Roads: complete reconstruction of roadway, curbs and base; Bridges: complete removal and replacement of bridge; Underground: removal and replacement of an underground drainage or water system; Hydrants: completely non functioning and replacement parts are unavailable.)

<u>Critical Candition</u> - requires moderate or partial reconstruction to maintain integrity. (E.g. Roads: reconstruction of roadway/curbs can be saved; Bridges: removal and replacement of bridge with abutment modification; Underground: removal and replacement of part of an underground drainage or water system; Hydrants: some non-functioning, others obsolete and replacement parts are unavailable.)

<u>Very Poor Condition</u> - requires extensive rehabilitation to maintain integrity. (E.g. Roads: extensive full depth, partial depth and curb repair of a roadway with a structural overlay; Bridges: superstructure replacement; Underground: repair of joints and/or minor replacement of pipe sections; Hydrants: non-functioning and replacement parts are available.)

Poor Condition - requires standard rehabilitation to maintain integrity. (E.g. Roads: moderate full depth, partial depth and curb repair to a roadway with no structural overlay needed or structural overlay with minor repairs to a roadway needed; Bridges: extensive patching of substructure and replacement of deck; Underground: insituform or other in ground repairs; Hydrants: functional, but leaking and replacement parts are unavailable.)

Moderately Poor Condition - requires minor rehabilitation to maintain integrity. (E.g. Roads: minor full depth, partial depth or curb repairs to a roadway with either a thin overlay or no overlay needed; Bridges: major structural patching and/or major deck repair; Hydrants: functional and replacement parts are available.)

Moderately Fair Condition - requires extensive maintenance to maintain integrity. (E.g. Roads: thin or no overlay with extensive crack sealing, minor partial depth and/or slurry or rejuvenation; Bridges: minor structural patching, deck repair, erosion control.)

Fair Condition - requires routine maintenance to maintain integrity. (E.g. Roads: slurry seal, rejuvenation or routine crack sealing to the roadway; Bridges: minor structural patching.)

Good or Better Condition - little to no maintenance required to maintain integrity.

Note: If the infrastructure is in "good" or better condition, it will **NOT** be considered for SCIP/LTIP funding unless it is an expansion project that will improve serviceability.

Criterion 2 - Safety

The design of the project is intended to reduce existing accident rate, promote safer conditions, and reduce the danger of risk, liability or injury. (e.g. widening existing roadway lanes to standard widths, adding lanes to a roadway or bridge to increase capacity or alleviate congestion, replacing non-functioning hydrants, increasing capacity to a water system, etc. Documentation is required.)

Note: Each project is looked at on an individual basis to determine if any aspects of this category apply. The applicant must demonstrate the type of problems that exist, the frequency and severity of the problems and the method of correction.

Criterion 3 – Health

The design of the project will improve the overall condition of the facility so as to reduce or eliminate potential for disease, or correct concerns regarding the environmental health of the area (e.g. Improving or adding storm drainage or sanitary facilities, replacing lead jointed water lines, etc.)

Note: Each project is looked at on an individual basis to determine if any aspects of this category apply. The applicant must demonstrate the type of problems that exist, the frequency and severity of the problems and the method of correction.

Criterion 4 - Jurisdiction's Priority Listing

The jurisdiction **must** submit a listing in priority order of the projects for which it is applying. Points will be awarded on the basis of most to least importance. The form is included in the Additional Support Information.

Criterion 5 – Generate Fees

Will the local jurisdiction assess fees or project costs for the usage of the facility or its products once the project is completed (example: rates for water or sewer, frontage assessments, etc.). The applying jurisdiction must submit documentation.

Criterion 6 – Economic Growth

Will the completed project enhance economic growth and/or development in the service area?

Definitions:

Directly secure significant new employment: The project is specifically designed to secure a particular development/employer(s), which will add at least 100 or more new employees. The applicant agency must supply specific details of the development, the employer(s), and number of new permanent employees.

Directly secure new employment: The project is specifically designed to secure development/employers, which will add at least 50 new permanent employees. The applying agency must supply details of the development and the type and number of new permanent employees.

Secure new employment: The project is specifically designed to secure development/employers, which will add 10 or more new permanent employees. The applying agency must submit details.

Permit more development: The project is designed to permit additional business development. The applicant must supply details. **The project will not impact development:** The project will have no impact on business development.

Note: Each project is looked at on an individual basis to determine if any aspects of this category apply.

Criterion 7 - Matching Funds - Local

The percentage of matching funds which come directly from the budget of the applying local government.

Criterion 8 – Matching Funds - Other

The percentage of matching funds that come from funding sources other than those mentioned in Criterion 7.

Criterion 9 – Alleviate Traffic Problems

The jurisdiction shall provide a narrative, along with pertinent support documentation, which describe the existing deficiencies and showing how congestion or hazards will be reduced or eliminated and how service will be improved to meet the needs of any expected growth or development. A formal capacity analysis accompanying the application would be beneficial. Projected traffic or demand should be calculated as follows:

Formula:

Existing users x design year factor = projected users

Design Year	Design year factor			
	Urban	Suburban	Rural	
20	1.40	1.70	1.60	
10	1.20	1.35	1.30	

Definitions:

<u>Future demand</u> – Project will eliminate existing congestion or deficiencies and will provide sufficient capacity or service for twenty-year projected demand or fully developed area conditions. Justification must be supplied if the area is already largely developed or undevelopable and thus the projection factors used deviate from the above table.

<u>Partial future demand</u> – Project will eliminate existing congestion or deficiencies and will provide sufficient capacity or service for ten-year projected demand or partially developed area conditions. Justification must be supplied if the area is already largely developed or undevelopable and thus the projection factors used deviate from the above table.

<u>Current demand</u> — Project will eliminate existing congestion or deficiencies and will provide sufficient capacity or service only for existing demand and conditions.

Minimal increase — Project will reduce but not eliminate existing congestion or deficiencies and will provide a minimal but less than sufficient increase in existing capacity or service for existing demand and conditions.

<u>No increase</u> – Project will have no effect on existing congestion or deficiencies and provide no increase in capacity or service for existing demand and conditions.

Criterion 10 - Ability to Proceed

The Support Staff will assign points based on engineering experience and OPWC defined delinquent projects. A project is considered delinquent when it has not received a notice to proceed within the time stated on the original application and no time extension has been granted by the OPWC. A jurisdiction receiving approval for a project and subsequently canceling the same after the bid date on the application may be considered as having a delinquent project.

Criterion 11 - Regional Impact

The regional significance of the infrastructure that is being repaired or replaced.

Definitions:

Major Impact - Roads: major multi-jurisdictional route, primary feed route to an Interstate, Federal Aid Primary routes.

Moderate Impact - Roads: principal thoroughfares, Federal Aid Urban routes

Minimal / No Impact - Roads: cul-de-sacs, subdivision streets

Criterion 12 – Economic Health

The District 2 Integrating Committee predetermines the jurisdiction's economic health. The economic health of a jurisdiction may periodically be adjusted when census and other budgetary data are updated.

Criterion 13 - Ban

The jurisdiction shall provide documentation to show that a facility ban or moratorium has been formally placed. The ban or moratorium must have been caused by a structural or operational problem. Points will only be awarded if the end result of the project will cause the ban to be lifted.

Criterion 14 - Users

The applying jurisdiction shall provide documentation. A registered professional engineer or the applying jurisdictions' C.E.O must certify the appropriate documentation. Documentation may include current traffic counts, households served, when converted to a measurement of persons. Public transit users are permitted to be counted for the roads and bridges, but only when certifiable ridership figures are provided.

Criterion 15 – Fees, Levies, Etc.

The applying jurisdiction shall document (in the "Additional Support Information" form) which type of fees, levies or taxes they have dedicated toward the type of infrastructure being applied for.
